

Configure & Connect

Follow the steps below to install, connect and configure Cisco AnyConnect for your iPhone or iPad.

1

Install the **Cisco AnyConnect** Client from the iTunes App Store.

2

Once installed, select the **AnyConnect** icon.

3

Enable this software by clicking **OK**.

4

Select **Connections**.

5

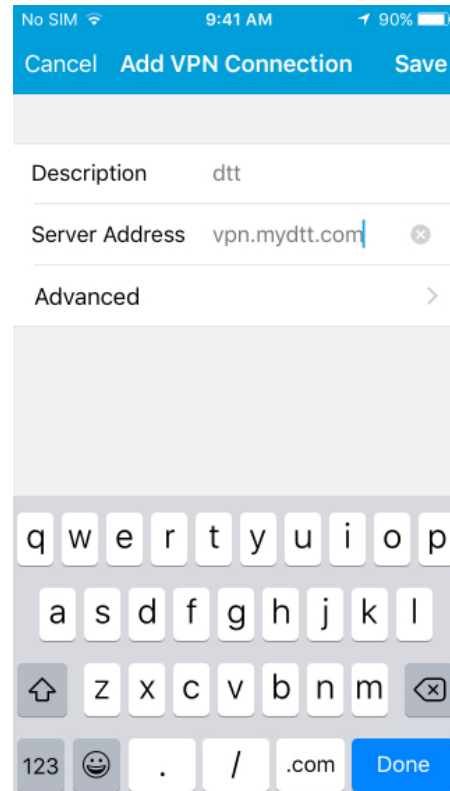

Select **Add VPN Connection**.

6

Click **Save**.

7

Enter a Description (e.g., DTT) and the Server Address: VPN.MYDTT.COM.

8

The Cisco AnyConnect Client is now configured on your device.

9

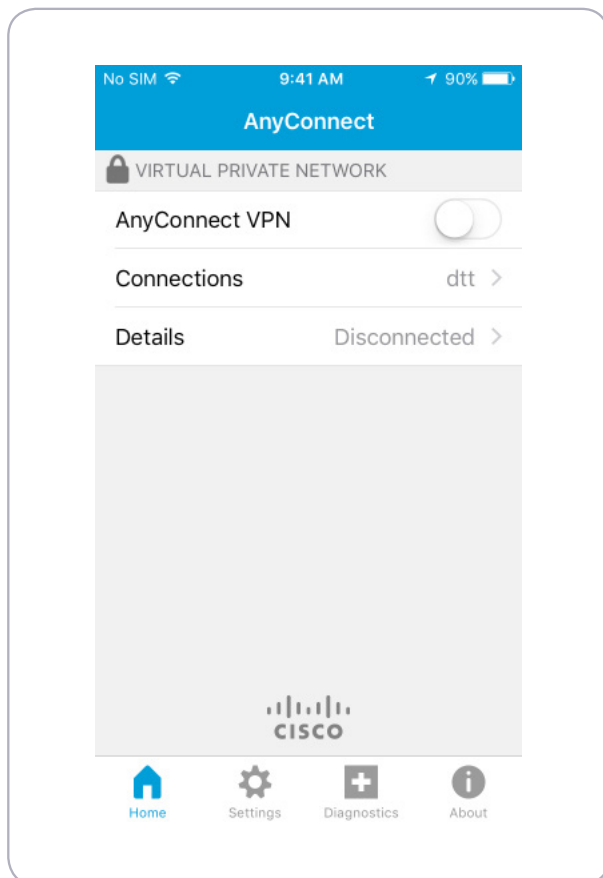

Select the AnyConnect icon to open it.

10

Select the VPN connection you added during configuration.

11

Turn AnyConnect VPN ON.

12

When prompted, enter your MyDTT™ email and password, then click Connect.

13

You should now be connected to the VPN.

MyDTT™

Open a browser on your iPhone or iPad and go to www.MyDTT.com. Log in with your MyDTT™ email address and password.

Disconnect

To disconnect from the VPN, select **OFF** from the **AnyConnect** app.
