Follow these Steps to Install GV-AView on Your Android

**1** On your Android phone, download the GV-AView application by clicking on the Google Play Store icon.

**2** Tap the magnifying glass in the upper right corner to search. Type "GVAView."

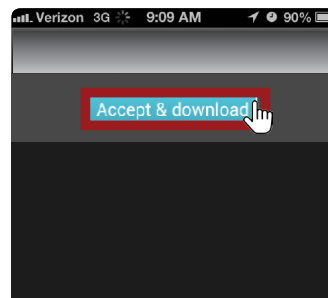

3 Select "GVAView."

**4** Once on application page, click "Install."

5 Click "Accept & Download."

6 GVAView will now show up on your desktop.

*Note: You can now access the DTT System using Android 2.2 and above.

Follow these Steps to Configure Live View (NVR/DVR View)

7 NVR/DVR View will allow you to see your store live. RPB View (Remote Playback View) will allow you to view recorded footage on your DVR. For now, we will just cover how to input the settings to configure the Live View.

Enter the following information:

- **HTTPS:** ON, unless advised otherwise.
- **Favorite Name:** Use your store number.
- **IP:** Concept-Store #.mydtt.com:8915
- **Port:** 8866
- **ID:** Set up for you by DTT.
- **Password:** Set up for you by DTT

Example IP:

*For McDonald's Locations: Store #.mcdtt.com:8915*

8 Click on the Link icon to connect.

Click on the Plus icon to save the site.

9 Live View will appear.

If camera views appear, you have successfully connected to your site. Swipe the screen in order to see more cameras or click on Next Page.
